1. Our plant and animal sciences research is in the top 15 in the world.

2. We give out $1.5 million in scholarships – which means 46 percent of our students graduate with no debt at all.

3. With nearly 15,000 acres in Agricultural Research Centers across the state, we work to meet the regional research and demonstration needs of agricultural producers and natural resource managers. A total of 36,000 people visit our centers each year.

4. In CAFNR’s annual assessment of advising, 96 percent of undergraduates rated their academic advisor as “excellent.”

5. Plant scientists in CAFNR have discovered the gene responsible for resistance to the costly soybean cyst nematode, and found a naturally occurring gene in soybeans that, when combined with another natural gene, increases the amount of healthy oleic acid from 20 percent to 80 percent.

6. CAFNR’s retention rate for fall 2018 was 90.7% – the first time in the college’s history we have exceeded 90%.

7. In fall 2018, 13 of the 16 State FFA Officers enrolled at CAFNR.

8. This past spring, we raised $1.59 million for CAFNR as part of Mizzou Giving Day – second among schools and colleges – making our college the recipient of $10,000 in bonus funds as part of the dollar challenge.

9. CAFNR has been the top Mizzou college in AAU grant expenditures each year since 2002.

10. The MU Grazing School has a $125 million annual impact on Missouri agriculture.

11. Our Animal Sciences Equine Teaching Facility is student run, involving more than 100 student volunteers each year.

12. Our two college-wide career fairs attract more than 150 employers to campus each year to help students find jobs and internships.

13. The MU Soil Testing Program, headquartered in Plant Sciences, provides research-based nutrient and lime recommendations to more than 32,500 customers each year.

14. The National Swine Research and Resource Center is located at MU – the only National Institutes of Health swine center in the United States.

15. Bioengineering is one of 15 prestigious Coulter Partner Departments in the nation.

16. The University of Missouri is ranked No. 1 in the 2018 Top Online Colleges for Master’s in Environmental Science. This recognition is based on the master’s degree in natural resources (agroforestry emphasis) online program.

17. CAFNR awarded more than 100 study abroad scholarships ($71,250) in 2017, more than double the awards made in 2016.

18. CAFNR has had 26 William T. Kemper Fellows for Excellence in Teaching winners.

19. The Missouri Show-Me-Select Replacement Heifer Program has had an impact of more than $150 million across its 20 years.

20. Our animal scientists are responsible for developing many porcine genetic models for human diseases such as cystic fibrosis.
